**United States Day
October 23
SHOULD BE OBSERVED
THROUGHOUT U.S.A.
BECAUSE:**

It is fitting that at the very time when the internationalists are flooding our country with propaganda, urging churches, colleges, schools, women's clubs, civic organizations, etc. to support the godless, alien controlled United Nations, we pause to reflect and be thankful that we are a free people, and rededicate ourselves to the preservation of a free and unfettered UNITED STATES OF AMERICA.

Don't be fooled—the proposed revision of The U. N. Charter is not to improve it, but to bring about the final destruction of the United States as a sovereign nation!

Let the American people awake before it is too late to save The United States of America!

OCTOBER 23
UNITED STATES DAY

This is a day for all loyal citizens of the

The Dual Government Of The United States

Address by The Honorable William E. Jenner, U. S. S.
Dallas, Texas

* * *

It is a favorable argument of the collectivists that foreign policy is something remote and abstract, which can be understood only by experts who have spent years in the precincts of the State Department or on the staffs of certain daily papers. Congressmen, who have not had the benefit of long indoctrination in the mysteries, and you, who do not even breathe the air of Washington, are supposed to sit patiently and wait until the great minds have handed down what you may know.

Americans never accepted such nonsense. Our greatest diplomatic achievements were the work of laymen, who had spent most of their years in private life. In the last few years we have been bewildered and bemused by foreign relations experts in Washington offices, but the moment has come when the American people need to decide what kind of foreign policy they wish to stand for, and then tell our government to follow it.

Sen. William E. Jenner

PRESIDENT EISENHOWER'S COMMITMENT TO THE FREE NATIONS

President Eisenhower's message on defense of the Nationalist stronghold on Formosa will certainly be a landmark in American foreign affairs, but what kind of a landmark it will be is not yet certain.

First let us look at the documents themselves—the message of the President, and the resolution of Congress supporting the President's position. In the words of the message and the resolution, the United States reaffirms its close ties with its loyal ally, the Nationalist government of China, and makes a commitment to defend the Nationalist stronghold with American military power if the Communists carry out their threat to attack it. This statement does not solve all the problems of our foreign policy in the Western Pacific. There is no good reason why it should. We have had twenty years of mismanagement of our activities in Asia. It is not reasonable to ask that any single statement clear away all the confusion. The message is significant because it deals with the most important question. We have announced that we shall tolerate no new retreat in Asia. The Red Chinese will not be permitted to breach the frontiers of the still free world. We make it clear that we shall meet Communist military action with military action, the only argument the Communists understand. We will not start the shooting, but if the Communists choose to start a war, we will finish it.

A foreign policy carefully worked out in many conferences, publicly stated on the authority of the Chief Executive, and supported by Congress and both parties, should be firm as a rock. But I say to you what you know well—that the foreign policy established in the Formosa papers is not firm at all. The fact that it is clearly,
